IIT Bombay
Spoken Tutorial

Modular Object-Oriented Dynamic Learning Environment (Moodle) is a Learning Management System (LMS) which help teachers and Academia through online platform for more adaptive and customized learning. It is free and open-source software being used by many small and large institutions to create and deliver courses online to their students. After completion of the FDP program Online Exam will be conducted in collaboration with IIT Bombay Spoken Tutorial.

About Course

Moodle has many built-in features ranging from the basics such as file **upload, assignments, quizzes, notifications, and advanced features such as forums, quizzes, wikis, etc** that can be used by learners.

This Moodle series is divided into 2 parts -

- One for Moodle site administrators and
 - Another for Academicians.
- **Moodle Site Administrators**
- Will install Moodle on the server
 - Create course categories as per institute guidelines and
 - Manage courses and user accounts for multiple courses
- **Teachers Will Learn To-**
- Upload and edit content for their course.
 - Create assignments and quizzes to assess the students' progress and
 - Enroll students to their course and communicate with them.

**Useful for System Administrators, Site Administrators,
Trainers and Faculty.**

**Online National Level Faculty Development Program (Self-Paced)
on
Open Source Learning Management System**
